

Anglo American at a glance

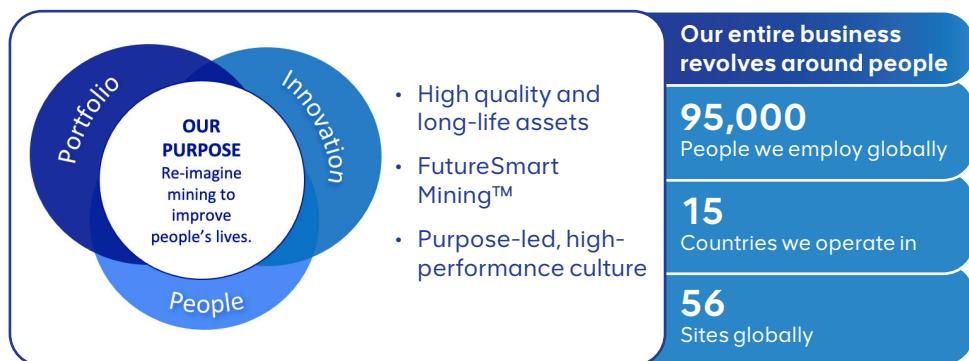

A world-class portfolio for cleaner, greener, more sustainable operations.

Anglo American is a leading global mining company, and our products are the essential ingredients in almost every aspect of modern life.

Our portfolio of world-class competitive operations, development projects and undeveloped resources provides many of the metals and minerals that enable a cleaner, greener, more sustainable world. With our people at the heart of our

business, we use innovative practices and the latest technologies to mine, process, move and market our products to our customers – and to discover new resources – safely and sustainably.

The Woodsmith Project

North Yorkshire, UK

The Woodsmith Project is a deep mine and associated transport, processing and shipping infrastructure development under construction in North Yorkshire, UK.

The state-of-the-art mine will extract polyhalite ore that will be transported on a conveyor belt system in an underground tunnel. It will then be granulated at a materials handling facility and exported from the Teesside port globally.

Polyhalite will be used to manufacture the multi-nutrient, low-chloride fertiliser POLY4.

POLY4 is an Anglo American PLC product.
