

# POLY4

An Anglo American PLC Product

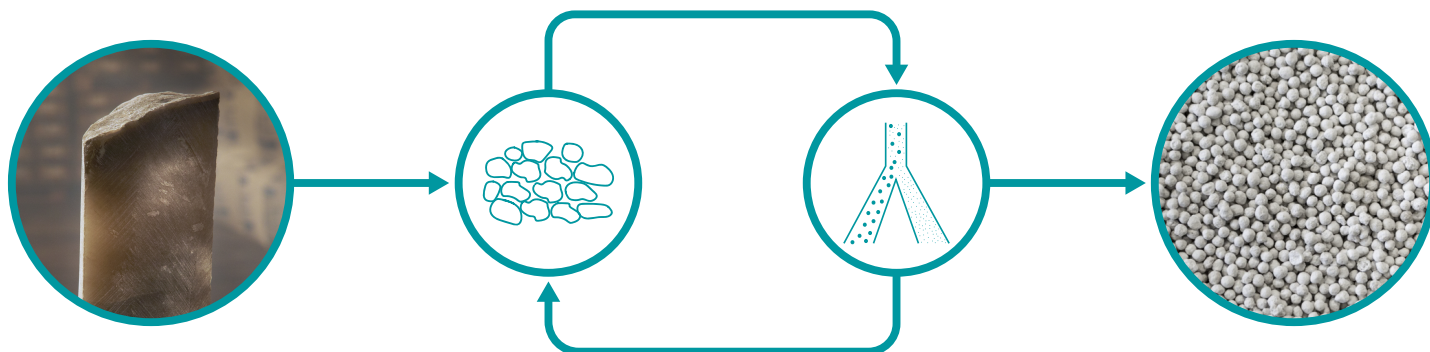

## Reimagining crop nutrition

POLY4 is an Anglo American PLC product.

With no chemical processing and low carbon footprint during manufacturing, POLY4 is suitable for organic farming and offers season-long crop nutrition, supplying four essential nutrients – potassium, sulphate-sulphur, magnesium and calcium – in one product.

This balanced nutrition, backed up by years of global agronomic data, will help increase yields, improve crop quality, and enhance structure and nutrient legacy of soils.

## Benefits of POLY4

Source of essential nutrients

Fully soluble

Improved fertilizer use efficiency

Improved nutrient recovery

Sustained nutrient delivery profile

Improved soil health

Low CO<sub>2</sub> emissions

Low in chloride

Successful as a component of NPK formulations

pH neutral

Suitable crush strength

36m effective spreading with uniform distribution pattern
